

# VEGETABLE IPM WINTER WEBINAR SERIES

EXTENSION   
UtahStateUniversity®

## Common Pests of Onions

Onions are grown commercially in Northern Utah on 1,600-1,800 acres. Join us for an informative webinar about common insects and diseases that affect these onion crops. This presentation will cover pest biology, identification, monitoring, and control.

**Nick Volesky (Vegetable IPM Associate)**  
Utah State University Extension

**Dr. Claudia Nischwitz (Plant Pathologist)**  
Utah State University Extension

Monday, Jan. 18 | 7 PM MST

1 pesticide CEU  
credit is available  
for live broadcast  
only.

Registration is free but required. After registering, you will receive email instructions to help you access the webinar via Zoom.
